TAK TV India — User Manual

How to run the website from day one: public site, newsroom, YouTube videos, Citizen Voice desk, data and planning

Version 1.0 · 30 October 2026 · For the owner, editors, reporters, moderators and office staff

Button names in this manual match the website as built on 30 October 2026. Screens are described in words (boxes headed “What you will see”) instead of pictures.

A Telugu quick-start is in chapter 15 (for native-speaker review). A one-page cheat sheet is supplied as a separate file to print.

Contents

1. What this website does
2. Before you start: accounts and who owns them
3. First-day setup
4. Daily routine for each role
5. Videos and Shorts (YouTube links only)
6. Stories, blogs, photo stories and data stories
7. Data Library and Source Library
8. Citizen Voice desk
9. Content Planner
10. The public site from a visitor’s view
11. Weekly and monthly routines
12. Troubleshooting and FAQ
13. Safety, privacy and legal basics
14. Glossary, checklists and contacts
15. Telugu quick-start (తెలుగు త్వరిత మార్గదర్శి)

1. What this website does

The website has four parts that work together:

Part	Who uses it	What it does
Public website	Everyone	News stories, YouTube videos and Shorts, blogs and data stories, the Data Library, Issues Followed, in Telugu and English (Hindi can be switched on later)
Citizen Voice portal	Citizens	“Raise Your Issue” form with photos, videos and documents; “Track Issue” with a reference number and secret code
Newsroom (admin) at /admin	Your team	Write and publish stories, add videos, run the Citizen Issues desk, plan content, manage data and sources
Back office (Supabase, YouTube, e-mail, Cloudflare)	Owner / administrator	Stores the data and files, sends e-mails, protects forms. See the Supabase guide

How it connects (simple picture):

> **What you will see:** Citizen → “Raise Your Issue” form → Citizen Issues desk (moderators) → “Convert to content idea” → Content Planner (research, script, recording) → video posted on YouTube → link pasted into Videos → published on the website → issue marked Published and the citizen sees the update on “Track Issue”.

Important ideas:

- **Videos live on YouTube.** You never upload a video file to the website. You paste the YouTube link; the website shows YouTube’s own thumbnail and player.
- **Nothing a citizen sends is published automatically.** Contact details and evidence are seen only by Moderators, the Editor-in-Chief and Admins.
- **Every figure needs a source.** Data cards cannot be published without a source, a data year and a verified date.
- **Scheduled items appear by themselves** at their publish time. Nobody needs to press anything at that moment.

2. Before you start: accounts and who owns them

Account	What it is for	Owner	Notes
Supabase (or Lovable Cloud)	Database, logins, private files	Organisation e-mail, plus a second admin	See “Supabase setup for beginners”
Lovable (and hosting)	Runs and publishes the website	Organisation e-mail	Holds the website settings and secrets
YouTube channel	Your videos and Shorts	Organisation Google account	Keep two managers on the channel
Domain name (e.g. yourdomain.in)	The web address	Organisation	Renew yearly; turn on auto-renew
E-mail sender (e.g. Resend)	Invitations, password resets, moderator alerts	Organisation	Needed before launch
Cloudflare Turnstile	“I am human” check on the Raise Issue form	Organisation	Free; gives two keys
Password manager	Stores every password and key	Owner + second admin	Never share passwords in chat

> **Warning:** Never create these accounts with one employee’s private e-mail. If that person leaves, you could lose the account.

3. First-day setup

3.1 Sign in as admin

1. Open your website address followed by /admin (for example https://www.yourdomain.in/admin). You are sent to the sign-in page.
2. Enter the admin e-mail and password created in the Supabase guide (chapter 7.4).
3. You arrive on the **Dashboard**.

> **What you will see:** A dark menu on the left (Dashboard, Write News, All Articles … Account) and a white page on the right with counters: Published today, Needs review, Drafts, Scheduled, Total published. Admins also see “Getting started” buttons.

> **Tip:** The newsroom signs you out after 4 hours without use. This protects the account on shared computers.

3.2 Site Settings (admins only)

Open **Site Settings** and fill in:

Field	What to enter
Site name	TAK TV India
Website address	Your full address starting with https:// (needed for Google and social sharing)
Contact email / Contact phone / Address	Public contact details of the newsroom
YouTube, Facebook, X, Instagram, WhatsApp	Full links to your pages (shown in the footer and on video pages)
Tagline (en / hi / te)	The short line under the logo in each language
Privacy contact	E-mail shown for privacy requests
YouTube channel ID	Starts with “UC” and has 24 characters (YouTube Studio → Settings → Channel → Advanced settings). Needed for “Import from YouTube”
Items in the top ticker	How many latest items scroll across the top (1–20)
Show Hindi on the public site	Leave OFF until Hindi text has been checked by a native speaker

Click **Save settings**. Changes appear on the public site straight away.

> **Warning:** The website refuses an address that does not start with https:// and a channel ID that is not 24 characters starting with UC. Read the red message and correct it.

3.3 Categories

Thirty topic categories are ready (Agriculture & Farmers, Irrigation & Water, Education, Health, Visakhapatnam City and so on). In **Categories** you can:

- **Edit** a name in English, Hindi and Telugu, change the **Menu order** number, or untick **Visible in menu** to hide it.
- **New** to add a category. Its web address is made from the English name.

3.4 Add the team and roles

Open **Team** → **Invite member** → Name, Email address, Role → **Send invitation**. The person receives an e-mail and sets a password.

Role	Write	Publish / schedule / delete	Citizen contact details & evidence	Settings, Team, Categories, Pages, Activity Log
Admin	Everything	Yes	Yes	Yes
Editor-in-Chief	Everything	Yes	Yes	No
Editor	Everything	Yes	No	No
Citizen Desk Moderator	Videos, posts, data, planner	No	Yes	No
Reporter	Own stories; videos, posts, data, planner drafts	No	No	No
Research Analyst	Data, sources, videos, posts, planner	No	No	No
Scriptwriter	Planner scripts, videos, posts	No	No	No
Video Editor	Videos, posts, planner	No	No	No
Social Media Manager	Videos, posts, planner	No	No	No
Web Admin	Videos, posts, planner	No	No	No

Notes:

- Only **Admin, Editor-in-Chief and Editor** can publish, schedule, unpublish or delete. The database enforces this, not just the buttons.
- **News stories** can be written only by Reporters (their own drafts) and the three publishing roles.
- All team members can see the Citizen Issues list and add internal notes, but only Admin, Editor-in-Chief and Moderator see names, phone numbers, e-mails and evidence files.
- To change a role, pick a new one in the list next to the person. To remove access, click the bin icon. You cannot change your own role or remove the last Admin.

3.5 The information pages

Open **Pages**, choose a page in the list (About us, Contact us, Privacy Policy, Terms & Conditions, Editorial & Corrections Policy, Corrections Log), edit the title and text, then **Save page**.

> **Warning:** The Privacy, Terms, Editorial and Corrections pages contain starter text only. Have

> them reviewed by your lawyer before launch.

3.6 Launch-day checklist

- ☐ Settings filled, website address correct (https://)
- ☐ Team invited with the right roles; every member has signed in once
- ☐ Information pages reviewed by your lawyer
- ☐ Turnstile keys and e-mail sender connected (ask your administrator)
- ☐ One test story, one test video and one test citizen issue done and then removed
- ☐ Sitemaps submitted in Google Search Console: /sitemap.xml and /news-sitemap.xml
- ☐ Hindi left OFF until reviewed

4. Daily routine for each role

4.1 Reporter

1. **Write News** → choose **Language** and **Category**, write the **Headline**, **Short summary** and **Story**.
2. Add a **Cover photo** with a caption (the website will not publish a story whose photo has no caption) and the photo credit.
3. Fill **Reporter**, **Location** and **Tags** under Details. Leave a message for the editor in **Note for editor**.
4. Click **Save Draft** often (it also saves by itself every 25 seconds once there is a headline). Use **Preview** to see it like a reader.
5. When ready, click **Submit for Review**. You can still change it while it is waiting; after it is published only an editor can change it.

4.2 Editor and Editor-in-Chief

1. Open **Needs Review** (the number next to it shows how many are waiting).
2. Open each story → check facts, sources, names, spelling and the photo caption/credit.
3. Click **Publish Now**, or set **Publish time (IST)** and click **Schedule**.
4. To correct a live story: edit it, then click **Update Live Story**. A draft saved on a live story stays private until you press Update Live Story.
5. Review videos and posts marked “Ready for review” in **Videos** and **Blogs & Posts**, and data cards in the **Data Library**.
6. Check the **Content Planner** for items due today.

4.3 Research Analyst

- Keep the **Source Library** up to date (official sites, reports, RTI replies).
- Add figures in the **Data Library** with source, data year and verified date (chapter 7).
- Fill “Data to collect” and “Suggested sources” on planner cards; tick **Data collected** and **Sources verified** in the checklist.

4.4 Scriptwriter

- Open your cards in the **Content Planner** (filter by your name in the **Everyone** list).
- Write in the **Script** box of the card. Move the card to **Script draft**, then **Fact-check** when done. Add a comment for the editor.

4.5 Video Editor and Social Media Manager

Post on YouTube first → paste the link here → add details → publish.

1. Upload and publish the video or Short on YouTube as usual.
2. On the website: **Videos** → **Add video** → paste the YouTube link (chapter 5).
3. Add the description in Telugu and English, category and **Sources & Proofs**.
4. Set status **Ready for review** (or ask an editor to publish).
5. Paste the Instagram reel or Facebook post links if you have them.

4.6 Citizen Desk Moderator

1. Watch the orange number next to **Citizen Issues** — it shows new issues.
2. Open each new issue, check it, set status, priority and assignee, add notes (chapter 8).

3. Ask for more information with a reply template when needed.
4. Convert strong issues into content ideas.
5. Never share contact details outside the desk.

4.7 Web Admin

- Check the public site daily on a phone and a computer: home page, a story, a video, Raise Your Issue.
- Report broken pages to the developer with the page address and the time.

4.8 Admin

- Weekly: **Activity Log** (who published, changed roles or settings), **Team** (remove leavers).
- Monthly: backups and access review (chapter 11).

5. Videos and Shorts (YouTube links only)

5.1 Why link-only

Video files and thumbnails stay on YouTube. The website stores only the link and the details you add. This saves storage, keeps the site fast, and every play still counts on your YouTube channel.

5.2 Add a video step by step

1. Open **Videos → Add video**.
2. In **YouTube link (required)** paste the link. Normal links (youtube.com/watch?v=…), short links (youtu.be/…), Shorts links (youtube.com/shorts/…), live links and an 11-character video ID all work.
3. Click outside the box. The website checks the link with YouTube.

> **What you will see:** A preview of the YouTube thumbnail appears, with the video title and channel name next to it, the video ID, and (if known) “Short” and the length, plus an “Open on YouTube” link.

1. The **title fills in automatically**: Telugu titles go into “Title (Telugu)”, others into “Title (English)”. If the YOUTUBE_API_KEY secret is set, the description, length, publish date and tags are filled too. Everything stays editable.
2. Check **This is a YouTube Short (vertical video)**. It is ticked automatically for /shorts/ links. If the video is 3 minutes or shorter, the website reminds you to tick it if it was posted as a Short.
3. Add the missing title or description in the other language.
4. Choose **Category (required to publish)**, and optionally Series, Region and Tags.
5. Add **Sources & Proofs** (5.4).
6. **Status**: Draft or Ready for review. Editors can choose Published or Scheduled (with a Publish time).
7. Click **Save video**.

5.3 Messages you may see

Message	Meaning	What to do
This video is already on the website.	Someone added this video before	Click **Open the existing entry** and edit that one
This is not a YouTube video link…	The text is not a video link (perhaps a channel or playlist link)	In the YouTube app tap Share → Copy link, paste again
The channel owner has switched off embedding…	YouTube will not play it inside other sites	Visitors will get a “Watch on YouTube” button. Fine for your own channel only if you allow embedding in YouTube Studio
YouTube says this video is private or removed.	The video is not public	Make it public on YouTube first, or do not publish it
YouTube could not be reached just now…	Temporary problem	Type the title yourself or try again later

5.4 Sources & Proofs

Under every video and blog post, readers see a list called **Sources & Proofs — Check the sources yourself**.

1. Click **Add a link**, or choose **+ Add from Source Library…** to start from a trusted source.
2. Fill: document/page title, the exact link (https://…), the type (Government data, Audit / CAG, Parliament Q&A, Court record, RTI reply, Research, Fact-check, News report, Other), the data/document year, the date accessed, the page or section, and a short note.
3. Use the exact page or PDF you relied on, not just the home page of a department.

5.5 “Needs details” and one-click publish

- In the Videos list, a draft shows **Needs details** while it lacks a title, a category or at least one source. Point at the badge to see what is missing.
- Videos brought in by **Import from YouTube** (or the hourly import) arrive as drafts with **Needs details**.
- When nothing is missing, editors see a **Publish** button in the list — one click publishes it.

5.6 Import from YouTube

Editors and admins: **Import from YouTube** reads your channel’s latest uploads (it needs the YouTube channel ID in Site Settings) and adds any new ones as drafts. Nothing is published automatically. An hourly job can do the same (ask the administrator).

5.7 What visitors see

- Video cards show YouTube’s thumbnail with a play button; Shorts show a vertical picture and a “Short” label.
- Clicking a card opens the video page with the player already starting. On the home page, “Latest Videos” opens a pop-up player; press Esc or the close button to close it.
- The YouTube player loads only after the click, using YouTube’s privacy-enhanced (no-cookie) player.
- Every video page has **Watch on YouTube** and **Subscribe on YouTube** buttons, and the Videos page has **All / Videos / Shorts** filters.

5.8 When a video becomes unavailable

- **Check YouTube links** (editors/admins) asks YouTube about every live video. A weekly automatic check can also run.
- Problem videos get a red badge: **Video unavailable on YouTube** (private or removed) or **Embedding switched off**.
- Visitors then see the thumbnail with “This video cannot be played here.” and a **Watch on YouTube** button instead of a broken player.
- What to do: fix it on YouTube (make it public / allow embedding), or **Unpublish** it on the website, or delete the website entry (the video stays on YouTube).

5.9 Every-video checklist

- ☐ Posted and public on YouTube
- ☐ Link pasted; thumbnail and title appeared; not a duplicate
- ☐ Titles and descriptions in Telugu and English checked
- ☐ Short box correct
- ☐ Category chosen
- ☐ At least one source with exact link, year and accessed date
- ☐ Published or scheduled by an editor; opened once on the public site

6. Stories, blogs, photo stories and data stories

6.1 News stories

- **Language**: one story = one language. Write a separate story for each language.
- **Category**, **Breaking news** (shows BREAKING in the top ticker for 48 hours), **Top story** (lead position on the home page).
- **Cover photo**: click **Add cover photo**, type the caption first, then upload a JPG, PNG or WebP (up to 12 MB). Photos are resized automatically. Or choose one from the Photo Library.
- Story photos inside the text: use the photo button in the editor toolbar.
- **YouTube video** box: paste a link to show a player inside the story.
- **Web address (slug)**: made from the headline; use lowercase English letters, numbers and hyphens (3–80 characters). For Telugu headlines, type a short English address.
- **Search appearance**: optional title and description for Google.
- **Schedule**: set Publish time (IST), then Schedule. The story appears on its own at that time.

6.2 Unpublish, archive, trash, corrections

In **All Articles**, use the ⋯ menu next to a story: **Unpublish**, **Archive**, **Move to Trash**, **Restore to Drafts**, **Delete permanently** (only from Trash). A removed story's address shows "This story has been removed". If you change the address of a live story, the old address forwards to the new one.

Corrections: edit the live story, add a dated correction line at the end ("Correction, 30 Oct 2026: …"), click **Update Live Story**, and add an entry to the **Corrections Log** page.

6.3 Blogs & Posts

Blogs & Posts → **New post** → **Type**: Blog article, Photo story, Data story or Quick update. Write in **Telugu text** and **English text** tabs. Cover: a photo (with caption, required) **or** "…or use a YouTube video's thumbnail as the cover" (paste a link — no picture is copied). Add Sources & Proofs, status, then **Save post**.

6.4 Photo Library

All uploaded photos with captions. A photo can be deleted only when no story uses it.

7. Data Library and Source Library

7.1 Rules for every figure

- Never type a number you cannot point to.
- Every published card needs **a source**, **a data year** and **a date verified**. The website refuses to publish without them.
- 2011 Census figures are a **baseline**, not today's situation. Show them as "Baseline: 2011" next to the latest year.

7.2 Add a data card

1. **Data Library → New data card**.
2. **Name (Telugu)** and **Name (English)**; **Geography** (India / Andhra Pradesh / district); **Unit** (%, ₹ lakh, persons).
3. **Data year (required to publish)** — the year the number describes.
4. **Baseline / comparison year** — for example 2011.
5. **Source (required to publish)** — choose from the Source Library (add it there first if missing).
6. **Date verified (required to publish)** — the day you checked the number against the source.
7. **Chart type**: Bars, Line or Table. **Chart numbers**: one line each, "Label, value" — for example "2011 (baseline), 62.4" then "2024, 71.9".
8. **Internal notes** are never shown publicly.
9. Status: Draft (editors choose Published). **Save data card**.

> **Note:** If the data year is more than three years old, visitors see an "Older data" label. Add a newer figure when one exists.

7.3 Source Library

Sixty trusted sources are ready. **Add source** → Name, Organisation, Website, Category, Type, Freshness / reliability note, What you get / usage tips. The list shows how many times each source is used. Use **Search sources…** to find one.

7.4 Every-data-card checklist

- ☐ Exact source document opened and saved
- ☐ Data year and baseline year correct
- ☐ Numbers typed twice and compared
- ☐ Date verified filled in
- ☐ Editor approved and published

8. Citizen Voice desk

8.1 How issues arrive

Citizens use **Raise Your Issue**: a short headline, a description, topic, district, mandal/village, location, optional map point ("Add my current location"), contact details or anonymous, and up to 5 files (photos up to 15 MB, MP4/MOV videos up to 150 MB, PDF/Word documents up to 15 MB). They pass an "I am human" check and receive a **reference number** and a **secret code**. The website checks every file's real contents and rejects disguised files.

Moderators see an orange number on **Citizen Issues** and, if e-mail alerts are set up, receive an e-mail with the reference and title only.

8.2 The desk screen

> **What you will see:** Four boxes at the top — Status counts, Top topics, Top districts, Time to first response (median, average, answered, still waiting). Below: filters for status, topic, district, assigned person, From/To dates and a search box, an **Export CSV** button, and the table of issues.

- **Export CSV** downloads the list you are looking at. It never contains phone numbers, e-mails or evidence.
- "First response" is the time until someone in the newsroom first acted on the issue.

8.3 Status workflow

Status	Use it when	What the citizen sees on Track Issue
New	Just arrived	Received
Under review	Someone is reading it	Under review
Need more info	You asked the citizen for more	More information needed
Researching / Verified	Checking facts with records and people	Being verified
Content planned	Turned into a story idea	In production
Published	Story/video published	Published as a story
Resolved / Rejected / Duplicate / Spam	Closed	Closed

8.4 Working an issue

1. Open the issue. Read it; look at the evidence and the map point (moderators, Editor-in-Chief, Admin only — file links last 15 minutes; reload the page for fresh links).
2. Set **Status**, **Priority** and **Assigned to**.
3. Add **Internal notes** (never shown to the citizen).
4. To ask for more information or give news: in **Update for the citizen**, pick a template from **Insert a reply template…** (Telugu, English, or both), edit it, **Save update**, and tick **Visible to the citizen**.
5. **Duplicate**: type the other issue's reference in "Mark as duplicate of" → **Merge**.
6. **Spam**: **Mark as spam & block**.

7. **Convert to content idea**: creates a planner card (no contact details are copied) and moves the issue to Content planned. The case page then shows the card with **Open planner card**. When that card reaches “Published”, the issue is marked Published automatically.

8.5 Privacy rules (always)

- Never publish or forward a citizen’s name, phone, e-mail, home location or evidence unless they agreed **and** an editor approved it. The form records whether the citizen agreed to their name being shown.
- **Blur faces** of people who did not agree to appear, children, and number plates, before using any photo or video.
- Do not download evidence onto personal phones. View it in the desk.
- If a citizen asks for their data to be deleted, tell the Admin; record the request and the date it was done.
- Do not copy citizen contact details into notes, planner cards, chats or spreadsheets.

8.6 Every-issue checklist

- ☐ Status, priority and assignee set within one working day
- ☐ Evidence checked; nothing published from it without consent and editor approval
- ☐ Citizen update written and made visible
- ☐ Duplicates merged; spam blocked
- ☐ Strong issues converted to content ideas

9. Content Planner

9.1 The 45-day plan

Forty-five topic cards are pre-loaded (topics, core questions and suggested sources only — no statistics). Fill in real data from real sources.

9.2 Views

- **Board**: columns Idea → Researching → Script draft → Fact-check → Ready to record → Recorded → Editing → Published. Use the stage list on a card to move it.
- **Calendar**: cards by week of their planned publish date.
- **Tasks**: every task with person and due date. Add tasks at the top.
- **Everyone** list: show only one person's cards.

9.3 A planner card

Titles, Category, Stage, Planned publish date, Due date, Owner, Region, **Core question to put to the government**, **Data to collect (2011 baseline → latest year)**, Suggested sources, **Ask viewers to send**, the **Checklist** (Data collected, Sources verified, Right of reply sent, Script reviewed, Thumbnail ready), the **Script** box, Comments and Tasks. **Create video draft** makes a linked draft in Videos. Click **Save card** to keep changes.

9.4 Worked example: from a citizen issue to a published video

1. A citizen reports that a ration shop is closed on working days (Raise Your Issue).
2. The moderator opens it, sets Under review, checks the evidence, then clicks **Convert to content idea**.
3. The editor sets the card's owner (reporter) and planned date; stage **Researching**.
4. The research analyst finds the official timings and the shop's licence record; adds a data card if there are numbers; ticks Data collected and Sources verified.
5. The reporter sends a right-of-reply request to the department; ticks Right of reply sent.
6. The scriptwriter writes the script in the card; stage **Script draft**, then **Fact-check**. The editor checks it and ticks Script reviewed.
7. The video is recorded and edited (stages Ready to record → Recorded → Editing), then posted on YouTube.
8. The video editor clicks **Create video draft** (or Add video), pastes the YouTube link, adds sources; the editor publishes.
9. The card is moved to **Published**. The citizen issue becomes Published automatically; the moderator writes a visible update for the citizen.

10. The public site from a visitor’s view

- **Top line and ticker**: today’s date, the tagline, and a red ticker with the latest stories, videos (▶️) and posts. It updates by itself.
- **Header**: logo, search box, language buttons (EN / తెలుగు, and हिन्दी when switched on).
- **Category menu**: all categories, then Videos, Raise Your Issue, Track Issue, Blogs, Data, Issues Followed.
- **Home page**: lead story and top stories, latest news, a “See a problem in your area?” banner, Latest Videos (pop-up player) and Latest Shorts, Latest Blogs & Data, Issues Followed, follow buttons.
- **Video page**: player (or “Watch on YouTube” if unavailable), title, date, length, description, Subscribe, Instagram/Facebook links, “Raise an issue on this topic”, Sources & Proofs, related videos.
- **Data**: cards with data year, baseline, “Older data” label, chart, source link and verified date.
- **Issues Followed**: issues you chose to publish, with Resolved/Ongoing labels and your update.
- **Raise Your Issue / Track Issue**: chapter 8.
- **Footer**: contact details, social links, About, Contact, Privacy, Terms, Editorial policy, Corrections, RSS.

11. Weekly and monthly routines

Weekly

- **Check YouTube links** in Videos; fix or unpublish flagged videos.
- Citizen desk: no issue left “New” for more than one working day; follow-ups written.
- Activity Log: unexpected publishing or role changes?
- Planner: overdue cards and tasks.
- Data Library: cards with “Older data” — look for newer figures.

Monthly

- Backups: confirm the daily backups exist; keep your own export (Supabase guide, chapter 9).
- Access review: Team list and Supabase members; remove leavers.
- Storage and costs: Supabase usage page (citizen videos grow fastest).
- Corrections Log: up to date.
- Report to management (KPI list below).

KPI list for management

KPI	Where to find it
Stories, videos, Shorts and posts published	All Articles / Videos / Blogs & Posts
Citizen issues received, by topic and district	Citizen Issues analytics boxes / CSV
Median time to first response	Citizen Issues analytics
Issues converted to content; issues published; resolved	Status counts
Data cards published; share with “Older data”	Data Library
Corrections published	Corrections Log
Video views and subscribers	YouTube Studio
Visitors and search traffic	Google Search Console / analytics

12. Troubleshooting and FAQ

#	Problem	Fix
1	I cannot sign in	Use “Forgot password?” on the sign-in page; check spam; ask the Admin to invite you again
2	“Newsroom access is not assigned”	You have an account but no role. Ask the Admin to set your role in Team
3	I was signed out	The newsroom signs out after 4 hours idle. Sign in again
4	I don’t see Publish Now	Only Admin, Editor-in-Chief and Editor can publish. Use Submit for Review
5	“Add a cover photo caption”	Type a caption for the photo, then save again
6	“Write at least 40 characters or add a video”	The story is too short
7	“Web address needs 3–80 lowercase letters…”	Fix the Web address (slug): English lowercase letters, numbers, hyphens
8	“Another story already uses that web address”	Change the slug slightly
9	Scheduled story did not appear	Check the time is IST and in the future when scheduled; reload the page after the time
10	Edited a live story but nothing changed	Click Update Live Story (a saved draft stays private)
11	“This video is already on the website.”	Click Open the existing entry
12	“This is not a YouTube video link”	Copy the link from YouTube’s Share button; channel and playlist links do not work
13	Title did not fill in	YouTube could not be reached or the video is private; type it yourself
14	Description/length not filled	Normal without the YOUTUBE_API_KEY secret; type it
15	Video shows “cannot be played here”	Private, removed or embedding off on YouTube; fix there or unpublish
16	Thumbnail looks blurry	Some videos have no high-resolution thumbnail; the site uses the best one available. Upload a custom thumbnail on YouTube

#	Problem	Fix
17	Short shows sideways	Tick “This is a YouTube Short” in the video and save
18	Import from YouTube says “Add your YouTube channel ID”	Fill YouTube channel ID in Site Settings
19	Data card will not publish	Add Source, Data year and Date verified
20	“Each chart line must look like: Label, 123”	One line per value, a comma before the number, no units in the number
21	Citizen says the form rejected a file	Only JPG, PNG, WebP, HEIC, MP4, MOV, PDF, DOCX; videos up to 150 MB, others 15 MB, 5 files maximum
22	Citizen saw “some files could not be uploaded”	Ask them to send again with the reference number; or by another channel
23	Citizen lost the secret code	It cannot be recovered. They can submit again; mark the old one duplicate
24	“Too many submissions from your connection”	Limit of 5 per hour per connection; wait an hour
25	I cannot see contact details	Only Moderator, Editor-in-Chief and Admin can
26	Evidence link does not open	Links expire after 15 minutes; reload the case page
27	No e-mail alerts for new issues	E-mail sender not set up (administrator); the orange badge still works
28	Hindi button missing	Hindi is OFF in Site Settings (on purpose until reviewed)
29	Settings will not save	Read the red message: website address must start with https://, channel ID UC + 22 characters, ticker 1–20
30	A photo cannot be deleted	It is used by a story; remove it from the story first
31	The site shows “This page didn’t load”	Try again; if it continues, tell the administrator the time and page address

13. Safety, privacy and legal basics

Editorial rules

- **Evidence first**: every claim needs a record, document, data source or on-record person. Put links in Sources & Proofs.
- **Equal scrutiny**: apply the same checks to every party, government and organisation.
- **Right of reply**: before publishing criticism, give the person or department a fair chance to respond and record it (planner checklist).
- **Corrections**: correct quickly and visibly; log every correction.
- **No invented numbers**: no estimates presented as data; label baselines (2011) clearly.
- **Separate news and opinion**: label opinion pieces clearly.

Citizen data

- Contact details and evidence only on the desk; never in chats, sheets or personal phones.
- Consent before showing a name or face; blur faces, children and number plates.
- Keep evidence only as long as needed; follow the deletion policy agreed with your lawyer.

When to call the lawyer

- Before publishing allegations of crime, corruption or misconduct against a named person.
- When you receive a legal notice, a take-down demand or a police request for citizen data.
- Before using leaked or confidential documents.
- When a citizen asks for deletion and the evidence is part of a published story.
- Before launching (Privacy, Terms, Editorial pages).

14. Glossary, checklists and contacts

Glossary

Word	Meaning
Database	Where the website keeps its text and lists
Migration	A numbered file that builds or changes the database
Role	What a team member is allowed to do
Draft	Saved but not public
Review	Waiting for an editor
Schedule	Set to go public automatically at a chosen time
Slug / web address	The end part of a page address, e.g. /en/news/village-road
Thumbnail	The small picture that represents a video
Embed	Showing YouTube's player inside our page
Short	A vertical YouTube video of up to 3 minutes
CAPTCHA	The "I am human" check on public forms
Backup	A saved copy of the data
Ticker	The red scrolling line at the top of the site
Sources & Proofs	The list of documents under a video or post
Baseline	An older reference year (often 2011) shown for comparison
Reference number / secret code	What a citizen needs to track an issue

Checklists

See: launch day (3.6), every video (5.9), every data card (7.4), every citizen issue (8.6).

Contact and escalation

Situation	First contact	If no answer
Website down or broken	Web Admin: _____	Developer: _____
Cannot sign in	Admin: _____	Second admin: _____
Supabase / billing	Owner: _____	Supabase support
YouTube channel problem	Social Media Manager: _____	Channel owner: _____
Legal notice, police request	Editor-in-Chief: _____	Lawyer: _____
Citizen data leak suspected	Admin: _____ (same day)	Lawyer: _____

15. Telugu quick-start (తెలుగు త్వరిత మార్గదర్శి)

> **Note:** ఈ అధ్యాయం స్థానిక తెలుగు భాషా నిపుణుడు సమీక్షించాల్సి ఉంది (for native-speaker review). బటన్ పేర్లు ఇంగ్లీష్‌లోనే ఉంటాయి, అవి వెబ్‌సైట్‌లో కనిపించినట్లే ఇక్కడ ఇవ్వబడ్డాయి.

లాగిన్

1. మీ వెబ్‌సైట్ చిరునామా తర్వాత /admin తెరవండి.
2. మీ ఈమెయిల్, పాస్‌వర్డ్‌తో లాగిన్ అవ్వండి. పాస్‌వర్డ్ మర్చిపోతే “Forgot password?” నొక్కండి.
3. 4 గంటలు ఉపయోగించకపోతే సిస్టమ్ మిమ్మల్ని సైన్ అవుట్ చేస్తుంది.

వార్త రాయడం (రిపోర్టర్)

1. **Write News** నొక్కండి. భాష (Language), విభాగం (Category) ఎంచుకోండి.
2. శీర్షిక (Headline), సారాంశం (Short summary), వార్త (Story) రాయండి.
3. ఫోటో జోడిస్తే దానికి వివరణ (caption) తప్పనిసరి.
4. **Save Draft** నొక్కండి. సిద్ధమైతే **Submit for Review** నొక్కండి.
5. ఎడిటర్ మాత్రమే **Publish Now** లేదా **Schedule** చేయగలరు.

వీడియో జోడించడం

ముందు యూట్యూబ్‌లో పోస్ట్ చేయండి → లింక్ ఇక్కడ పేస్ట్ చేయండి → వివరాలు జోడించండి → ప్రచురించండి.

1. **Videos** → **Add video** నొక్కండి.
2. యూట్యూబ్ లింక్ పేస్ట్ చేయండి. థంబ్‌నెయిల్, శీర్షిక వాటంతటవే వస్తాయి.
3. షార్ట్ అయితే “This is a YouTube Short” టిక్ చేయండి.
4. విభాగం (Category) ఎంచుకోండి, **Sources & Proofs** లో ఆధార లింక్‌లు జోడించండి.
5. **Save video** నొక్కండి. “This video is already on the website.” అని వస్తే, ఆ వీడియో ఇప్పటికే ఉంది.
6. వీడియో ఫైల్‌ను వెబ్‌సైట్‌కు ఎప్పుడూ అప్‌లోడ్ చేయవద్దు.

పౌరుల సమస్యలు (మోడరేటర్)

1. **Citizen Issues** పక్కన ఉన్న నారింజ సంఖ్య కొత్త సమస్యలను చూపుతుంది.
2. సమస్యను తెరిచి Status, Priority, Assigned to సెట్ చేయండి.
3. పౌరునికి సమాధానం కోసం **Insert a reply template…** నుంచి తెలుగు టెంప్లేట్ ఎంచుకోండి, సరిచూసి **Save update** నొక్కి, **Visible to the citizen** టిక్ చేయండి.
4. మంచి సమస్యను **Convert to content idea** తో ప్లానర్‌కు పంపండి.
5. పౌరుని పేరు, ఫోన్, ఈమెయిల్, ఆధారాలను ఎవరికీ పంపవద్దు, ఎక్కడా ప్రచురించవద్దు. ముఖాలను బ్లర్ చేయండి.

డేటా కార్డు

1. ప్రతి సంఖ్యకు మూలం (Source), డేటా సంవత్సరం (Data year), ధృవీకరించిన తేదీ (Date verified) తప్పనిసరి.

2. 2011 జనగణన సంఖ్యలు ఆధార సంవత్సరం (Baseline) మాత్రమే — ప్రస్తుత పరిస్థితి కాదు.
3. ఊహించిన సంఖ్యలను ఎప్పుడూ వాడవద్దు.

సహాయం కావాలంటే

లాగిన్ సమస్య → Admin. వెబ్‌సైట్ పనిచేయకపోతే → Web Admin. చట్టపరమైన నోటీసు → Editor-in-Chief.
